## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 19 – 33 are allowed.
2. The following is an examiner's statement of reasons for allowance: There was no reference in the prior art search that disclosed, taught, or suggested a fixation and positioning device for fixing and positioning a component while applying a process, the device comprising a first mechanical fixation means and a second mechanical fixation means, spaced a distance apart from each other, and arranged and adapted to receive the component between the first and the second mechanical fixation means; and a magnetic field generation device arranged and adapted to generate a second magnetic field, which, in co-action with the first magnetic field, effects a force to support the component against its gravitational force along a distance between the first mechanical fixation means and the second mechanical fixation means. Kiyoshi et al. (JP 02185975) disclose a magnetic field arranged to support a component, and Njisse et al. (WO 99/17034) disclose two magnetic fields arranged to support a component, however neither reference discloses all of the limitations as outlined above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Election/Restrictions***

Art Unit: 1734

3. This application is in condition for allowance except for the presence of claims 14 – 18 directed to an invention non-elected without traverse. Accordingly, claims 14 – 18 have been cancelled.

### EXAMINER'S AMENDMENT

The application has been amended as follows:

Claims 14 – 18 are canceled.
